

A WORKING CONCEPT

project plan

Inputs in → operations → outputs

NAME YOUR PROJECT

INPUTS — *source files and context*

OPERATIONS — *prompts, skills, scripts, and tools*

OUTPUTS — *files or other results*

MAKE OPERATIONS REUSABLE

Keep useful prompts, skills, scripts, and tools in **operations/** so you can run the same process on new inputs.

BREAK UP LARGER PROJECTS

A larger project can use several small operations. Often the **output** of one operation becomes an **input** to the next.
